

**1st Northern German String Workshop**  
Hamburg, February 13/14, 2006

**Program**

**Preliminary program:** February 6th, 2006

**Program:** <http://zmp.desy.de/>

**Monday, Sept. 13th, 2006, Bldg. 2a, Seminar room 2**

14.00 - 14.50	<b>Matthias Staudacher</b> (Golm)	AdS/CFT Integrability, the Hubbard Model, and Transcendentality
14.50 - 15.40	<b>Sakura Schäfer-Nameki</b> (Hamburg)	Quantum corrections to spinning strings and the string Bethe ansatz
15.40 - 16.10	Break	
16.10 - 17.00	<b>Sergey Solodukhin</b> (Bremen)	Holographic gravitational anomalies
17.00 - 17.50	<b>Alexandra Castro</b> (Hannover)	Nilpotent deformations of the $N=(1,1)$ gauge multiplet

**Tuesday, Sept. 14th, 2006, Bldg. 2a, Seminar room 2**

09.00 - 09.50	<b>Manfred Herbst</b> (DESY)	D-branes in Gauged Linear Sigma Models
09.50 - 10.40	<b>Jürg Käppeli</b> (Golm)	How to count the microstates of black holes in four-dimensional $N=4$ string theory
10.40 - 11.10	Break	
11.10 - 12.00	<b>Mario Salizzoni</b> (Berlin)	D-branes in overcritical electric fields
12.00 - 12.50	<b>Kasper Peeters</b> (Golm)	Holographic decays of large-spin mesons
